Here's where we're at: 1) We installed Unibeast on a usb key 2) We installed clover on that same key with the legacy instructions found here: (are these the same settings you used when installing clover on the USB key?) 3) We got to the clover boot screen and tried to start the install (we have tried to check off 'Kernal PM Patch' in options and we have tried leaving that alone - no luck either way).. I have inherited a NEW Dell XPS 8700 Came with a 1TB HD Any issue or problem to swap in a SSD hard drive for the primary and use the current HD as the secondary?4) We get a 'Missing Bluetooth Controller Transport' error.. 10 Step 10 Use clover configurator to add necessary boot arguments (I will include a copy of my config.. Install clover on the UniBeast flash drive Step 4 Place the Kexts in EFI>Clover>Kexts>10.. I have heard that this is a graphics card/graphics injection error Oh and my system is a Dell XPS 8700: -i5-4660 3.
